### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or reasonably teach a modular prosthesis comprising a locking member adapted to lock the head the stem in desired orientation, wherein the locking member retains the patrix member within the socket between the locking member and the head socket with a force sufficient to lock the patrix member securely and rigidly in place relative to the stem and the head, wherein the force is distributed around atleast one ring of contact between the patrix member and the locking member and the at least one ring of contact between the patrix member and the head socket. The device of Bahler teaches away from the invention by disclosing that the articulation and friction faces are not spherical surfaces. The device of DeCarlo, Jr. teaches away from the invention by disclosing that the patrix member are not securely and rigidly locked in place relative to the stem and the head. DeCarlo discloses a pin and a slot aperture that allow the patrix and the head to move relative to the stem and the head. Thus the examiner has allowed claims 1-33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
